

Live Market Data, Right On Your Site

A reason for traders to check back — and land next to your exchange recommendations.

Auto-refresh

\$0

Ongoing cost

1 What it does

A live-updating price board for the major cryptocurrencies (Bitcoin, Ethereum, Solana, and more), refreshing automatically — no page reload needed. It sits right alongside your exchange comparisons and trading calculators.

2 Why it matters

- **A reason to return daily.** Live prices give traders a habit-forming reason to check your site, not just a one-time visit.
- **Sets the context for a sale.** Someone watching prices move is primed to act — with your exchange and bot recommendations one click away.
- **Zero ongoing cost.** Free data source, no subscription, no usage limits that matter at normal traffic levels.

Ready out of the box

Live and updating automatically the moment your site is deployed — no setup required.
