

Turn Your Telegram Bot Into a Product

A free taste, then a one-tap paid unlock — a real revenue stream from your channel.

3

Free tools shown upfront

1 tap

To pay and unlock

\$0

Merchant account needed

1 What it does

Anyone who messages your bot gets a free preview — enough to see the value — then a single tap to unlock your entire catalog. Payment happens instantly, inside Telegram, with no forms, redirects, or account creation. The moment they pay, they're granted access automatically.

2 How it works

THEY MESSAGE

Your bot

They see 3 sample tools for free — enough to build trust and show real value.

THEY TAP

"Unlock All"

A payment sheet appears right inside Telegram. No app switch, no website, no card form to fill out.

INSTANTLY

They're in

Full catalog access opens automatically — remembered permanently, no re-purchasing on their next visit.

3 Why it matters

- **A second revenue stream beyond affiliate commissions.** You're not only earning when someone else's product converts — you can charge directly for curated access.
- **Zero payment setup to start.** No merchant account, no approval wait, no monthly fees — it works from day one.
- **Frictionless checkout wins more sales.** Every extra step in a payment flow loses buyers — this is as close to one-tap as it gets.
- **Upgrade path built in.** When you're ready to accept real-currency card payments too, that's a config change, not a rebuild.

Ready out of the box

Fully built and tested. You choose the price; everything else — the preview, the checkout, the unlock — is already wired up.
