Ready to generate

1 strength + 1 tradeoff

Every review, always

1 What it does

Instead of a one-line description, key tools get a real review — what it does, a genuine strength explained concretely, and an honest limitation a buyer should know before purchasing. This is deliberately not marketing copy dressed up as a review; it's built to earn trust, which is what actually drives affiliate conversions.

2 Why it matters

- **Longer content ranks better.** In-depth reviews are exactly what search engines reward — this is some of the strongest SEO content type available.
- **Balanced reviews convert better than hype.** Buyers trust a source that mentions tradeoffs, which paradoxically makes them more likely to act on the recommendation.
- **Scales without a writer.** Once you're ready, the rest of the catalog can get the same treatment automatically.
