

Never Lose a Commission to a Dead Link

Every affiliate link gets checked automatically, every week, for free.

173 **Weekly** **\$0**

Automatic checks

Cost

1 What it does

A broken affiliate link doesn't just look bad — it's a lost commission every time a visitor clicks it and hits a dead page. This runs a check on every single link in the catalog automatically once a week and flags any that stop working, so problems get caught before they cost money.

2 Why it matters

- **Protects revenue silently.** Companies rebrand, change URLs, or shut down — this catches it within a week instead of whenever you happen to notice.
- **Protects trust.** A site full of dead links looks abandoned; visitors notice, even subconsciously.
- **Zero maintenance.** Runs on a schedule automatically — nothing to remember to do.

Already running

Live from the moment the site is on GitHub — the first automatic check happens on the next scheduled Monday.
