**2-in-1**

Clicks + email list

## 1 What it does

A private, password-protected page shows exactly which tools are getting clicked and how often, ranked highest to lowest — plus your growing email subscriber list in the same place.

## 2 Why it matters

- **Prioritize what to promote.** Instead of guessing which affiliate programs to chase first, the data tells you which tools your audience already wants.
- **Spot what's not working.** A featured tool with zero clicks is a signal to swap it out or reposition it.
- **One place for both key metrics.** Clicks and email signups — the two numbers that matter most for a growing affiliate site — live on one page.

### Ready to turn on

Fully built and tested — just set one password to activate it.
